

THE PREPAREDNESS REPORT

The Center for Emergency Preparedness and Disaster Response

Volume 5, Issue 34 | August 24, 2007

ELEVATED THREAT LEVEL

US DHHS Region I (New England) Emergency Planning Office (Office of the Assistant Secretary for Preparedness and Response – OASPR)

Region I (New England) Medical and Public Health emergency planning list server: A list server allows widespread distribution of information to all Internet users subscribed to the list. Subscribers may send a message to a single address from which the message is forwarded to everyone on the list making it a great way of communicating with a large group of people. The hope is that individuals will use the Region 1 emergency planning list server as a resource to share information around the region about training and events, as well as to ask questions, communicate and link with other individuals with similar interests. To enroll on the list server please visit http://list.nih.gov/archives/rgn_i_esf8-l.html.

Please pass this link on to everyone appropriate and disseminate as widely as possible in the region. Also, please start contributing your own information to the group. For any issues or questions, please contact Greg Banner, Regional Emergency Coordinator, Region I (New England) Department of Health and Human Services at (617) 565-1485, (617) 777-6404 or gregory.banner@hhs.gov.

The following resources are identified to assist your preparedness activities:

New/Highlighted Resources: Special Populations. "Sheltering People With Disabilities: Draft Space and Layout Considerations", Universal Access Committee. Connecticut Department of Emergency Management and Homeland Security, Jan 2007. http://www.ct.gov/demhs/lib/demhs/emergmgmt/planningguides/space_layout_considerations.pdf

An article in Emerging Infectious Diseases (Volume 12, Number 6, June 2006) which shows a way to improvise a reusable face mask (for use during flu, etc) <http://www.cdc.gov/ncidod/EID/vol12no06/05-1468.htm>

DHS Preparedness Videos:
For People with Disabilities: <https://www.ready.gov/america/getakit/disabled.html>

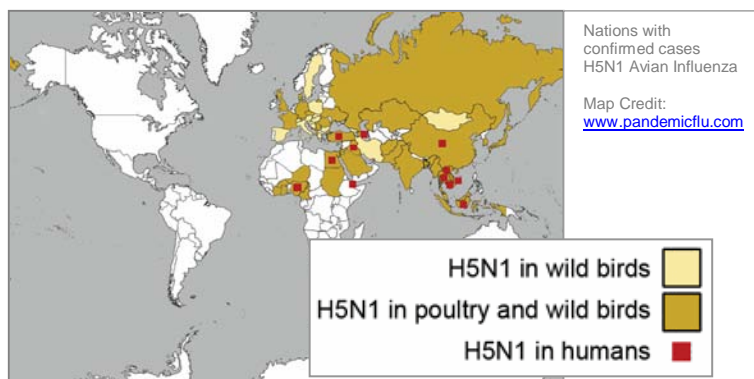

For Older Americans: <https://www.ready.gov/america/getakit/seniors.html>

Preparing Pets for Emergencies: <http://www.ready.gov/america/getakit/pets.html>

Office/Asset Highlighted: The New England Center for Emergency Preparedness, Dartmouth College <http://dms.dartmouth.edu/necep/>

Avian Influenza: **New**

According to the World Health Organization (WHO), the cumulative number of confirmed cases of avian influenza H5N1 as of August 23, 2007 is 322 cases and 195 deaths.

- On August 14, 2007, a 17-year old female from the Tangerang District, Banten Province in Indonesia died after being hospitalized with symptoms of avian influenza H5N1 the day before. An investigation is ongoing to determine how she was exposed to the H5N1 virus. To read this release in full, please visit http://www.who.int/csr/don/2007_08_16/en/index.html.
- A second death from avian influenza H5N1 has been confirmed on the popular tourist resort of Bali in Indonesia. A 28-year old female poultry trader died on August 21, 2007, after being hospitalized with breathing problems and high fever a few days earlier. A ban on moving fowl has been instituted by the local authorities in Bali who also have culled thousands of chickens since the first confirmation of the first human death from avian influenza H5N1 August 12, 2007. To read this release in full, please visit <http://209.190.25.146/viewNews.php?id=940>.
- A bird flu control system has been established by Singapore in Tangerang City, Indonesia. The system will have two volunteers stationed in more than 100 villages who are tasked to receive first-hand information on suspected bird flu cases for quick treatment. To assist with this system, Singapore has provided two computers to record cases, 13 disinfectant sprayers and 208 motorcycles. To read this release in full, please visit <http://209.190.25.146/viewNews.php?id=941>.

North American Plan for Avian and Pandemic Influenza: **New**

On August 21, 2007, Canada, Mexico and the United States announced the North American Plan for Avian and Pandemic Influenza, developed as part of the Security and Prosperity Partnership of North America (SPP). Among other topics, the plan promotes communication and collaboration between health authorities in the three countries as part of an effort to prepare for and manage avian and pandemic influenza. The plan also provides an overview of federal management structures in each country and addresses border control measures. To learn more about the plan and to access the plan in full, please visit <http://www.state.gov/g/avianflu/91242.htm>.

INSIDE THIS ISSUE

- 2 Consolidation of NIOSH 800 Number
- 2 Disasters around the World

- 3 National Preparedness Month
- 4 YNH-CEPDR Fall Course Guide

- 4 Infectious Disease Spreads Internationally
- 6 Upcoming Meetings and Events

Biomedical Advanced Research and Development Authority (BARDA)

In cooperation with private industry, the Biomedical Advanced Research and Development Authority (BARDA), within the Office of the Assistant Secretary for Preparedness and Response in the U.S. Department of Health and Human Services, makes provisions for research and advanced development of future drugs, vaccines, treatments and diagnostic technologies to counteract chemical, biological, radiological and nuclear (CBRN) agents and widespread emerging infectious diseases.

On August 3, 2007, BARDA sponsored the Biomedical Advanced Research and Development Authority Industry Day, held at the Fairmont Hotel in Washington, DC. The purpose of this one-day conference was to provide an open forum for companies interested in working with the Federal Government to showcase technological advances in medical countermeasures to manmade and naturally occurring threats. The format of the 2007 BARDA Industry Day consisted of concurrent breakout sessions on the following topics: vaccines, therapeutics, medical diagnostic products, and non-pharmaceutical countermeasures for CBRN events and pandemic influenza.

The meeting participants included present and former US Government officials, members of the biopharmaceutical industry, and academic subject matter experts in areas including vaccine and drug development, infectious diseases and radiation biology and physics. Joseph Albanese, PhD from the Yale New Haven Center for Emergency Preparedness and Disaster Response (YNH-CEPDR), presented ongoing efforts in Connecticut to build biosimetry laboratory surge capacity by engaging the participation of clinical laboratory professionals across the state. For further information relating to the 2007 BARDA Industry Day or the Biosimetry Laboratory, please contact Dr. Joseph Albanese by email at Joseph.Albanese@ynhh.org or by telephone at (203) 688-3316.

Consolidation of the NIOSH 800 number with CDC-INFO

Beginning on August 30, 2007, the NIOSH 800-number information service (1-800-35-NIOSH) will become part of the toll-free

CDC-INFO public information contact center. CDC-INFO is the US Centers for Disease Control and Prevention's consolidated call and e-mail handling center. Established in 2005, CDC-INFO provides one-stop access to all the information resources of NIOSH and CDC. CDC-INFO call center representatives are available 24 hours a day, 7 days a week and answer public inquiries in English and Spanish. Individuals who currently use the NIOSH 800-number may notice some changes in the way inquiries are processed, especially publication requests; the CDC asks callers bear with them through the transition phase. Please note the new telephone number: 1-800-CDC-INFO (1-800-232-4636) and email cdcinfo@cdc.gov. TTY: 1-888-232-6348.

Disasters around the World: **New**

Since August 18, 2007, Iowa, Minnesota, Ohio, Wisconsin and other Midwest residents have been dealing with devastation caused by severe weather, including flooding across several states. Parts of Ohio is experiencing its deepest flood waters in almost 100 years, forcing several hundred people to leave their homes and forcing the evacuation of 130 inmates in a Findlay, OH, jail. The Red Cross estimates that as many as 4,200

homes in Minnesota has been affected by the storm, including over 250 homes that are complete losses. In Madison, Wisconsin, a child and two adults were killed after a lightning strike caused downed power lines to fall onto a flooded street where they were standing. The total death toll blamed on the severe weather across the Midwest and from remnants of Tropical Storm Erin across Texas, Oklahoma and Missouri has now reached 26. To read this article in full, please visit

<http://hosted.ap.org/dynamic/stories/F/FLOODING?SITE=INKEN&SECTION=HOME&TEMPLATE=DEFAULT>.

The August 15, 2007, 7.9-magnitude earthquake that struck Peru caused severe damage to the service network and left more than 30,000 families homeless. The town of Pisco was hardest hit where 335 of the total 503 deaths occurred. A total of 1,042 people were injured and now the government is prioritizing providing the population with safe drinking water, conducting epidemiological surveillance to avoid transmission of diseases and clean-up after the earthquake and following aftershocks. To read more about the health situation and disaster priorities in Peru, please visit http://www.paho.org/english/dd/ped/EQPeru_807.htm.

On August 22, 2007, it was reported that the monsoon season in South Asia that began in June is causing widespread flooding that has led to 2700 deaths across India, Bangladesh and Nepal and caused food shortage and disease outbreaks. Waterborne diseases have sickened more than 300,000 people in India alone where people have rioted against insufficient government relief efforts. It is believed that over 20 million people have been affected by the flooding, with thousands of homes lost and millions of acres of cropland destroyed. To read this article in full, please visit http://coe-dmha.org/apdr/index.cfm?action=process3&Sub_ID=245&news=22907&pubDate=08/22/2007.

Crandall Canyon Coal Mine
Credit: AFP/Getty Images/
Justin Sullivan

After a fifth hole into the mountain in Huntington, Utah, failed to offer any new clues as to the fate of the six miners trapped since August 6, 2007, a final hole will be drilled in an effort to locate the miners. Other rescue efforts involving tunneling through the collapsed mine to locate the miners have been suspended after three rescue workers were killed and six others injured during a second cave-in on August 16th. The trapped miners are believed to be about 3 1/2 miles inside the mine, situated 140 miles south of Salt Lake City. To read this article in full, please visit

http://hosted.ap.org/dynamic/stories/U/UTAH_MINE_COLLAPSE?SITE=VACUL&SECTION=HOME&TEMPLATE=DEFAULT.

Emergency Credentialing Program: **New**

Dodging the Bullet

Hurricane Dean
Credit: AFP/NOAA-HO

The weather news of the past week shows us only too well how quickly a major hurricane can develop. Tropical Storm Dean quickly formed and grew to a massive category five storm prior to hitting Mexico. A different

weather event has caused massive flooding in the Midwest and the Great Plains. Even the best planning comes up short when dealing with events of this magnitude. Extra resources are always needed. The Connecticut/New York/New Jersey metropolitan area is long overdue for a major hurricane. One resource that can answer the call is the Emergency Credentialing Program. This is a program of both pre-credentialed and credentialed hospital disaster volunteers from many disciplines who have offered to respond when a natural or manmade event overwhelms a facility, region or state. Volunteers who agree to assist are given facility and event specific "just-in time" training to assist their work in their new setting. Volunteers are covered for liability and workers' compensation. Please check out our web site at www.ct-esar-vhp.org to see if this program is for you. Enrollment is completed on line and basic disaster related education is provided. If you have any questions, please feel free to contact us at ecp@ynhh.org or call Joseph Filakovsky, DNP, APRN, Emergency Credentialing Program Coordinator at (203) 688-4468.

Positions Available at YNH-CEPDR

YNH-CEPDR has openings for Exercise Specialists, Network Development Specialist, Regional Education Specialists and a Grant Research Specialist. Please contact Mark Schneider at (203) 688-2577 or mark.schneider@ynhh.org for more information, or apply online at <http://www.yalenevhealth.org/info/jobs.html>.

Disasters around the World (*continued*): **New**

Preparedness is a vital part of managing and surviving hurricanes as well as other emergency and disaster situations. The Centers for Disease Control and Prevention (CDC) hurricane health and safety website has information and links to different topics and tools that can help you prepare. Please visit the website at <http://www.emergency.cdc.gov/disasters/hurricanes/>.

In weather-related incidents, incident command can be used to provide management over various resources. The management of logistics over a large area is important to priority setting in a large-scale event. Use of incident command can help decide who to evacuate, what property to protect, what types of people and resources are required, healthcare concerns and more. Incident Command for Hospitals, HICS IV, was recently updated by the California Emergency Medical Services Authority. The update not only ensures compliance with the National Incident Management System (NIMS) but cross communication between multiple agencies and jurisdictions in the event of an emergency such as a hurricane. YNH-CEPDR has developed workshops that discuss the HICS IV organizational chart, job action sheets and forms as well as provide an overall context for implementation. For more information on how your hospital or healthcare organization can understand HICS IV, please contact Kimberly Spaulding at (203) 688-4482 or kimberly.spaulding@ynhh.org.

National Preparedness Month

September 2007 is the fourth annual National Preparedness Month. This nationwide initiative is sponsored by the U.S. Department of Homeland Security (DHS) and is designed to encourage Americans to prepare for emergencies. The 2007 National Preparedness Month will focus on back-to-school planning, business preparedness, multicultural preparedness and home and family preparedness. For more information, please visit the DHS National Preparedness Month website at <http://www.ready.gov/america/npm07/index.html>.

The Yale New Haven Center for Emergency Preparedness and Disaster Response (YNH-CEPDR) is promoting National Preparedness Month by distributing information related to family and individual preparedness at the following locations:

Greenwich Hospital	September 11 th , 9:00 a.m. to 5:00 p.m. September 12 th , 6:00 a.m. to 2:00 p.m.
Bridgeport Hospital	September 13 th , 9:00 a.m. to 5:00 p.m. September 14 th , 6:00 a.m. to 2:00 p.m.
Yale-New Haven Hospital	September 18 th , 9:00 a.m. to 5:00 p.m. September 19 th , 6:00 a.m. to 2:00 p.m.

For more information, please contact Samantha Kopp at (203) 688-2563 or samantha.kopp@ynhh.org.

New "First-Responders": Digital Technology In Focus

In addition to the traditional first responders (police, fire and rescue workers), a new group of first responders consisting of ordinary citizens equipped with digital cameras are emerging. In recent years, people who have been witness to disasters have shot pictures and videos of events that instantly become available to the public, news media and governments around the world. Following the Minneapolis, MN, bridge collapse, the Transportation Safety Board requested and received pictures from people witnessing the collapse that may assist in their investigation. To read this article in full, please visit http://www.boston.com/news/nation/articles/2007/08/04/digital_age_spawns_a_new_first_responder/?page=1.

Education and Training Courses

YNH-CEPDR has developed a strategic partnership with HealthStream to distribute EM 103 w/NIMS and EM 140 w/NIMS. This partnership supports a broader dissemination of these courses as a strategy for hospitals and healthcare systems to become compliant with NIMS education and training requirements. For more information, please contact Scott Selig at scott.selig@ynhh.org.

Introduction to Emergency Management with NIMS (EM 103 w/NIMS) is available at

<http://ynhhs.emergencyeducation.org/>. Yale New Haven Health System employees should access the course via the learning management system at <https://www.healthstream.com/HLC/Login/Logi.aspx?organizationID=6e27bcaa-71bd-db11-bf7b-000423d6b5c1> EM 103 w/NIMS meets the required objectives of IS 100, IS 700 and IS 800 for healthcare organizations and provides awareness-level emergency preparedness training for the healthcare delivery workforce. EM 103 w/NIMS is designed to assist healthcare workers in understanding their role in providing continuous care for existing patients and additional patients in the event of an emergency or a terrorist event. For more information, please contact Mark Schneider at (203) 688-2577 or mark.schneider@ynhh.org.

Incident Command Systems (ICS) for Healthcare with NIMS (EM 140 w/NIMS) is a 50-

minute course, which offers an introduction to ICS for healthcare workers and is available at

<http://ynhhs.emergencyeducation.org/>. Yale New Haven Health System employees should access the course via the learning management system at <https://www.healthstream.com/HLC/Login/Logi.aspx?organizationID=6e27bcaa-71bd-db11-bf7b-000423d6b5c1>. EM 140 w/NIMS meets the required objectives of IS 200, IS 700 and IS 800 for healthcare organizations. This course describes the ways an ICS can provide a consistent approach to command, control and coordinate of all efforts aimed at protecting life, preserving property, supporting the emergency response and stabilizing the operations of a healthcare site during an emergency or disaster. For more information, please contact Mark Schneider at (203) 688-2577 or mark.schneider@ynhh.org.

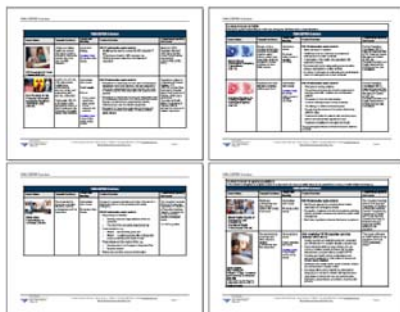

Infectious Diseases Spreads Internationally: **New**

On August 23, 2007, the World Health Organization (WHO) announced the World Health Report 2007. As infectious diseases are spreading faster than ever with more than 2 billion people traveling by air every year, international cooperation and effective response to new and emerging diseases are essential to securing global public health. The report included six key recommendations to implement the highest level of global public health security, including all countries' full implementation of the revised International Health Regulations (IHR 2005) and sharing of knowledge, technologies and materials, including viruses. To read this article in full and to access a link to the report, please visit

<http://www.who.int/mediacentre/news/releases/2007/pr44/en/index.html>.

Yale New Haven Center for Emergency Preparedness and Disaster Response: Fall 2007 Course Guide: **New**

The Yale New Haven Center for Emergency Preparedness and Disaster Response (YNH-CEPDR) develops, delivers and evaluates educational programs designed to prepare the healthcare delivery workforce for effective response to all types of disasters and emergencies. YNH-CEPDR creates and adapts courses for healthcare organizations based on the latest research and developments in emergency response, incorporating national standards and regulations relevant to healthcare emergency preparedness, adhering to industry standards for instructional design and considering the special needs of busy adult learners. To view the new Fall 2007 Fall Course Guide, please visit http://www.ynhhs.org/emergency/YNH-CEPDR_Courses_Fall07.pdf. For more information, please contact please contact Mark Schneider at (203) 688-2577 or mark.schneider@ynhh.org.

Joint Commission Resources 3rd Annual Emergency Preparedness Conference, - Abstracts Deadline Extended to August 31, 2007: **New**

Earthquakes, tornados, heat waves, floods, oil spills, fires, nuclear accidents, dirty bombs, pandemic flu, terrorism threats, hurricanes, blackouts, blizzards; the list of disasters is endless – and continues to grow. On average, natural disasters cause 185 deaths per day. The loss of human life, the physical and environmental damages, the disruption to school, homes, business and productivity and the financial impact can be devastating to any community or country. But the impact of many disasters can be sharply reduced if an effort is made to assess risk and develop and test contingency plans for disaster response before it happens, rather than after the damage is done.

Joint Commission Resources (JCR) will present its third annual emergency preparedness conference at the Hilton Alexandria Mark Center in Alexandria, Virginia, on October 10 and 11, 2007. This outstanding program provides attendees with new ideas, concrete tools, tips, checklists and strategies to help them prepare their organizations and jurisdictions for peak performance, self-sufficiency and constant readiness. Once again, JCR is partnering with the Yale New Haven Center for Emergency Preparedness and Disaster Response (YNH-CEPDR) on the scientific abstract session for the conference. Providing a forum for attendees to share their experience and expertise with colleagues from around the country, the abstract session will be even bigger and better than last year, with 25 submissions being selected for poster presentation and two selected for platform presentation during the conference plenary sessions on October 10, 2007. **Abstracts must be submitted by 5:00 p.m. on August 31, 2007, and will be peer-reviewed for their quality, originality and relevance to the conference.** For more information on the abstract submission process, please go to <http://yalenewhavenhealth.org/emergency/disasterconference/>. For more information or to register for this conference, please visit <http://www.jcrinc.com/24835/>, or call JCR Customer Service at (877) 223-6866.

Education and Training Courses (*continued*):

At the request of the Bioterrorism Training and Curriculum Development Program of the HHS, the YNH-CEPDR EM 103 w/NIMS and EM 140 w/NIMS courses were reviewed by the NIMS Integration Center. These courses provide a solution to address elements 9 through 11 of the NIMS Implementation Activities for Hospitals and Healthcare Systems. **These courses meet all of the required objectives defined by the NIMS National Standard Curriculum Training Guidance as demonstrated on the YNH-CEPDR NIMS Competency Crosswalk, which may be accessed at http://www.ynhhs.com/emergency/YNH_CEPDR_NIMS_CompencyCrosswalk.pdf.** EM 103 w/NIMS and EM 140 w/NIMS were approved as being NIMS compliant for healthcare education and training requirements by the State of Connecticut Department of Public Health and the State of Connecticut Department of Emergency Management and Homeland Security. To download a brochure, please visit http://www.ynhhs.org/emergency/NIMS_Brochure-Final.pdf. For more information, please contact Mark Schneider at (203) 688-2577 or mark.schneider@ynhh.org.

Best Practices for the Protection of Healthcare-Based First Receivers, Awareness-Level (EM 120) is available at <http://ynhhs.emergencyeducation.org/>. Yale New Haven Health System employees should access the course via the learning management system at <https://www.healthstream.com/HLC/Login/Login.aspx?organizationID=6e27bcaa-71bd-d611-bf7b-000423d6b5c1>.

EM 120 is aligned with the Occupational Safety and Health Administration (OSHA) required awareness-level competencies for first receivers. Sample job classifications that may be required to complete EM 120 in order to ensure compliance with OSHA standards include: (1) All employees who work in the emergency department (such as clinicians, housekeeping, security, patient registration, etc.); (2) All employees who are regularly scheduled to be on call for the emergency department; (3) Volunteers and residents assigned to the emergency department; (4) Employees involved in setting up, taking down or maintaining decontamination facilities, regardless of their primary job role and location; (5) Nursing leadership who function as potential nursing administrators on call; (6) All members of the hospital decontamination team. For more information, please contact Mark Schneider at (203) 688-2577 or mark.schneider@ynhh.org.

The online publication *Emerging Infectious Diseases* article entitled "Respirator Donning in Post-Hurricane New Orleans" states that "An observational study of 62 healthcare workers in three California hospitals found that 40 (65%) improperly put on N95 FF respirators before entering the room of a patient in isolation for tuberculosis,"

<http://www.cdc.gov/eid/content/13/5/700.htm>. Properly fit personal protective equipment can help control the spread of airborne infections including pandemic influenza. YNH-CEPDR is currently developing **N95 Respirator Fit Tester Training (EM 122)**. This 20-minute online course provides an in-depth look at the fit testing process used to test the seal of the N95 respirator and meets OSHA fit-testing requirements. The N95 respirator is worn by healthcare workers treating patients with

infectious airborne diseases, including pandemic influenza. This course is designed to provide just-in-time training to healthcare workers that must perform fit tests. The use of text and video combined with a cue card, available to print, gives fit testers a more robust learning experience and a useful job aid. The anticipated release is the fall of 2007. For more information, please contact Mark Schneider at (203) 688-2577 or mark.schneider@ynhh.org.

Best Practices for the Protection of Healthcare-Based First Receivers, Operations Level (EM 220) is a four-hour

online course followed by a four-hour hands-on training. EM 220 is designed to advance healthcare workers from the awareness level to the operations level of training for healthcare-based decontamination teams. Prior to enrolling in this operations-level course, participants are required to have successfully completed the awareness-level course, EM 120. EM 220 is recommended for healthcare workers with roles in their facility's decontamination process including medical practitioners (MD/DO, PA, NP), nurses (RN, LPN), allied health (ED techs, nurses aides, etc.), maintenance staff, environmental services staff, facilities staff, engineering staff, security and outside contractors. This course prepares healthcare workers to identify possible risks associated with unannounced patients and fulfill specific roles in the decontamination process and trains healthcare workers to properly use protective equipment. It meets OSHA Standard 29 CFR 1910.120 and the Best Practices for Healthcare-Based First Receivers of Patients, which was a result of the OSHA revisions of February 2005 to address concerns of hospital responders. For more information, please contact Mark Schneider at (203) 688-2577 or mark.schneider@ynhh.org.

Education and Training Services

YNH-CEPDR is committed to developing and delivering effective and scaleable services that advance healthcare planning, preparedness and response for emergencies and disasters. YNH-CEPDR offers the following services to hospitals, other healthcare delivery organizations, emergency management professionals, the business community and others.

- **ASSESSMENTS:** Hazard Vulnerability Analysis, Business Impact Analysis and Gap Analysis
- **PLANNING:** Emergency management plans, emergency operations plans and business continuity plans
- **EDUCATION and TRAINING:** Course development and course delivery in various modalities (including web-based)
- **DRILLS and EXERCISES:** Design, development, facilitation and evaluation

For additional information about these services, please contact Scott Selig at scott.selig@ynhh.org or (203) 688-2587 or Kimberly Spaulding at kimberly.spaulding@ynhh.org or (203) 688-4482.

Upcoming Meetings and Events
