## How to Change Key Settings on Trilogy Evo

	j3		_		Not V
Daytime	4	Accept	Cancel		/
Circuit Passive	Tidal Volume	PC Min/Max 10/20 cmH20	PEEP 5 cmH2O	Insp. Time 1.2 s	
Mode A/C-PC AVAPS	Breath Rate 15 BPM	Trigger Type Auto Trak	Trigger Sens. Auto	Rise Time 2	
Advanced	AVAPS Speed 5 cmH2O/min				
Inspiratory Ti	ime (s)			I:E Ratio 1:2.3 Exp. Time 2.8 s	
0.3	.2		5.0	- +	

Adjust prescription parameters, then tap **Accept** to save values Blue fill indicates the parameter is selected. Black in the corner indicates that the parameter has been changed from the prescription

FiO<sub>2</sub> can ONLY be adjusted via the
O<sub>2</sub> regulator on the wall. It can be
monitored if the appropriate FiO<sub>2</sub>
sensor is installed. See below to
monitor FiO<sub>2</sub>.
