OVERVIEW:
Clinical Laboratories throughout Connecticut have volunteered to prepare biodosimetry samples in the event of a radiological incident. This narrated CD provides step-by-step instructions for preparing biodosimetry samples.

TARGET AUDIENCE:
Clinical laboratory professionals in satellite laboratories who have completed the instructor-led course on biodosimetry sample preparation and need refresher training. This CD is also for those preparing to take the biodosimetry samples competency test.

THE CD COURSE INCLUDES:
- Narrated screens that describe materials and equipment needed to prepare biodosimetry samples
- Steps to complete the preparation of biodosimetry samples
- Closed captioning of each narrated screen, which is available with the click of a control button
- Close-up images for each step in the process
- Knowledge check questions that test the learner’s retention of the sample preparation process and provide feedback about the answers
- Laboratory protocol for processing the samples available for printing
