

Radiology and Biomedical Imaging

November 6, 2020

There are two different pathways for a patient, provider, or designee to get ambulatory imaging scheduled during the COVID-19 pandemic. Please remember that ALL IMAGING now requires an appointment, including general x-ray exams.

Pathway 1

If a patient answers **YES** to **ANY** of the COVID screening questions, they will be directed to call our COVID-19 Radiology Hotline 475-246-9660 in order to triage, and then subsequently schedule themselves at an approved radiology “hotsite” across our health system.

Pathway 2

If a patient answers **NO** to **ALL** of the COVID screening questions, they can call our radiology central scheduling department to schedule their exam at 203-688-1010, or 833-772-0003.
