ADULT OFFICE TRIAGE for Patient Calls w/ Respiratory Symptoms – DO NOT BRING PT INTO OFFICE without PUI precautions

START: Telephone Triage

If patient has symptoms

Asymptomatic COVID exposure

Nursing or clinician: Review and confirm exposure meets CDC definition

ADVICE FOR ALL ASYMPTOMATIC PATIENTS:
- Self monitor per CDC
- Call back for fever or respiratory symptoms
- Exposure recommendations:
  - HCW exposure - refer to YNHHS algorithm
  - Household exposure - self quarantine 14 days, regardless of test results, monitor for symptoms and test on day 5.
  - Community exposure - self quarantine 14 days, monitor for symptoms, test on day 5

Triage to MD/APRN / PA or Call Center if no clinician available

Symptoms e.g.
- Cough, shortness of breath, or difficulty breathing
- Fever or chills
- Muscle or body aches
- Headache
- Vomiting or diarrhea
- New loss of taste or smell

ADVICE FOR ALL SYMPTOMATIC PATIENTS:
- Self isolate pending results of COVID test
- Symptom management
- Call back for worsening symptoms
- Order COVID testing (PCR if available)
- Order FLU testing if indicated and available - treat those at high risk for complications empirically with Tamiflu without delay
