How to Change Key Settings on LTV 1200 Ventilator

To set a variable control:

1) Select the control by pressing the associated button. The display for the selected control will be displayed at normal brightness and all other control displays will be dimmed.

2) Change the control value by rotating the Set Value Knob. Rotate clockwise to increase and counter-clockwise to decrease the value.

3) The new control value goes into effect when the operator:
   - Presses the selected button again, or
   - Selects another control, or
   - Presses the Control Lock button, or
   - Waits 5 seconds

   All controls will then return to their normal brightness.
